UFOs, Nazis, Fascism...

Dear Sirs,
this history appears very incredible, but there're many original documents that proof it, documents that our Centre (Italy's National UFO Center, since 1965; president Mr. Roberto Pinotti) have studied for many years before to publish all the news, documents verified with chemical tests by an independent scientist. In these documents there are UFO-sightings over Venice and Mestre in 1936: a cygar-shape and two flying saucer (one like Saturn) chased by an Italian Militar plane (there're two drawings...). According to man who has this material (secret reports, a diary, others fascist dossiers), in 1933 a flying saucer landed in Italy (perhaps near Milan); it was recovered by Fascism's secret policy (OVRA) and witnesses and reporters were "silenced"; after this episode, Mussolini created secret Gabinetto RS/33, to study these strange things (he thinked were Allied secret weapons); Gabinetto RS/33 was headed by Guglielmo Marconi, with scientists Dallauri, Pirotta, Crocco, De Blasi, Giordani of Real Science Academy; between 1933 and 1940 Gabinetto RS collected mani UFO-sighthings "ante litteram"; in 1938 Adolf Hitler, during his travel in Italy (Rome, Naples and Florence) met Mussolini and obtained some material and documents about flying saucers (and after Nazis built V-7). In 1943, during Italian Social Republic, many documents were captured by nazis (but others documents not... we have them!). So, "unofficial" ufology (with secret commissions, debunking and cover up) was born in Italy, 1933 - not in U.S.A., 1947, no offence meant for American collegues UFOresearchers -.
I'm - with Mr. Pinotti - Italian UFOlogist who's studying those intriguing documents (I shall publish many documents in our site http://www.cun-italia.net). I'm nc fanatic, not nazist, I'm skeptict about many UFO-themes but I believe these documents are astonishing (sorry for my terrifying English...).
Best wishes from Italy

Alfredo Lissoni

Mussolini Said To Have Formed Secret UFO Study Group In 1933

From AGETI_Giuliano-Jimmy-Marinkovicc 9a4ag@clarc.org 5-18-00

(Note - This is a message to physicist Jack Sarfatti sarfatti@well.com forwarded to us by Ed Komarek ekomarek@mail.caironet.com

Hello dear UFO researchers,

A few weeks ago, I received this report from the member of my AGETI mailing list. It sounds very interesting and I would like to definetly hear more about it, because it seems this is some kind of new ufology data with documents that were recently released in Italy.

Can anyone check this? Anyway, I am sending you the translation of the report in English. The name of the the person who has sent this report is Dario Bernobicc <dario.bernobic@ri.tel.hr and he is located in city Rijeka, Croatia.

TRANSLATED MAIL FROM CROATIAN LANGUAGE TO ENGLISH

From Phaeton <dario.bernobic@ri.tel.hr Short review of the UFO show broadcasted on RAI DUE (Italy)

Hello

One week ago about noon on italian national TV station RAI DUE the show 'I fatti voostri' was broadcast...a show where many different people are guests and speak about different subjects. That day I accidentaly switched to that station and heard that they are speaking about UFOs. Immediately, I started to record, and now I have found some free time to write this short review for the list :)))

On the show, the guests were 2 Italian ufologists, the editors of magazine "UFO notizziario" (UFO messenger). The first subject of their chat was the connections between Fascist leader Benito Mussolini and UFO's.

Back in 1933, Mussolini had gathered together the greater part of scientists headed by G. Marconi and maybe formed the first worldwide secret organization for exploration of the UFO phenomena. The organization was active from 1933 to 1940 and they gathered many documents and pictures.

Ufologists have brought to the show 2 teletype telegrams from 1933 where Mussolini is ordering the censorship of releasing of any information about possible appearance of crafts of unknown origin or unknown phenomena.

Especially, he (Mussolini) forbids the spreading of information about some kind of UFO landing near Milano (??).

Also during the show, Mussolini's speech from 1941was mentioned. This speech was made before USA became inolved in the war (WWII), in the era of tension between USA and Axis forces.

In that speech, Mussolini said the USA should care more about attack from extra-terrestrial civilization which could land on Earth in the crafts that people have never seen, than about the Axis forces. In that time, that speech hadn't been understood as a serious one.

In the show, the pictures, films and other documents were shown from the archives of project Blue Book. From the 12,000 analysed cases, there were 701 unexplained cases. There were also some comments about triangular UFO which was recorded in the beginning of 1990s, above Belgium, and it couldn't be explained as something from this Earth.

After that, there was analysis of amateur photo of flying saucer in the form of hat from the 60s, also from the project Blue Book archives. The attention in the show was especially about photos where the UFO was clearly visible.

In the end, ufologists mentioned that in the Italy, a government organisation for the study UFO's exists, but that organization never makes any conclusion for the public, they only put cases in archives.

All in one, there was 20 interesting minutes about UFO's in the clear daylight time and in the show which many people watched. Not bad!

Dear Jack

This was the report of CUN on the ITALIAN X- FILES FASCITI under Centro Ufologico Nationale under the president Roberto Pinotti

Look at their Website for details: CUNITALIA- org

I have been good friends with Dr Pinotti ever since Allen Hyneck asked me to bring him to America in 1981 because he actually had slides of UFOs from the Italian Air Force. Let me know what else you wish to know. Best regards ,

Paola Harris Rome
